SUMMARY

Math and computer science student at McGill, graduating December 2026, with two co-op terms at CI Global Asset Management in data analysis, automation, and advisor communications. President of McGill CodeJam, the university's largest engineering hackathon. Bilingual in English and French, based in Montreal and open to Toronto.

EXPERIENCE

Distribution Enablement Co-op | CI Global Asset Management, Toronto, ON May 2026 – Aug 2026

- Analyzed Sales team adoption and client engagement patterns using Salesforce and Seismic data to form recommendations; advised on a new content schema and SharePoint reorganization supporting the ETF/Mutual Fund advisory merger and the Invesco Canada acquisition.
- Benchmarked CI funds against competitors on since-inception metrics unavailable through Morningstar's API; built the Excel analytics workbook on a Python-generated data layer for Power Query.
- Supported an initiative to automate fund performance reporting in Seismic LiveDocs (.NET, SQL, Cinchy); built the initial prototype and proposal for the Equities analysts, forecast to save the Investment Advisory team 40+ hours per month.

Investment Advisory Analyst Co-op | CI Global Asset Management, Toronto, ON Jan 2026 – Apr 2026

- Identified a regulatory compliance bottleneck and built an automated workflow using Morningstar bulk data and custom glossaries, cutting a 146-page manual translation task to 34 pages across 34 Know-Your-Product documents.
- Researched capital flow trends and drafted analysis for published macro commentaries on hyperscaler capex funding and legacy SaaS disruption; wrote positioning collateral for the Global Alpha Innovators, Emerging Markets, and Small Cap funds for global distribution.

Software Developer Intern | ITM Instruments Inc., Montreal, QC May 2024 – Sep 2024

- Automated data migration between production and test environments (Python, SQL, MariaDB); built data-extraction and order-conversion tools for Jira workflows.

Technology Enablement Advisor Intern | KPMG Hungary, Budapest, Hungary Jun 2021 – Sep 2021

- Analyzed operational workflows for international clients to identify automation opportunities; designed UiPath RPA solutions and presented recommendations to senior advisors.

LEADERSHIP

President | McGill CodeJam – Engineering Hackathon, Montreal, QC May 2024 – Dec 2026

- Progressed from participant (2023) to Logistics Lead (2024–25) to President (2026) of McGill's largest hackathon; currently leading a 12-person team to deliver a 400-person campus event on November 26, 2026.
- Partnered with enterprise sponsors to design a framework for hosting and judging agentic AI submissions; restructured the competition around AI-native development lifecycles, including token equity across participants.

EDUCATION

B.Sc. Joint Mathematics & Computer Science | McGill University, Montreal, QC Sep 2023 – Dec 2026

Coursework: Applied ML, AI, Algorithm Design, Operating Systems, Probability, Statistics, Numerical Analysis, Big Data, Computational Theory, Negotiations and Conflict Resolution. **Exchange Term:** University of Glasgow

BASc Computer Engineering | Queen's University, Kingston, ON Sep 2020 – Jun 2022 (Transferred)

Senator Frank Carrel Merit Scholarship (\$20,000), Dean's Honour List

SKILLS

Programming: Python, Java, SQL, TypeScript/JavaScript, C/C++, C#/.NET, Scala, R

Web & Backend: React, Node.js, FastAPI, Django, Flask, REST API design, Supabase

Cloud & Infrastructure: Git, Linux, AWS (EC2/S3), Docker, Kubernetes, Cloudflare, Tailscale, CI/CD pipeline

Data: PostgreSQL, MariaDB, Snowflake, Pandas, NumPy, Apache Spark, Hadoop, Power Query

ML/AI: PyTorch, TensorFlow, LSTMs, LLM, CNN, fine-tuning, classifiers, encoder-decoder models, heuristic agents for competitive bots

Design Practices: Agile, architecture documentation, AI-assisted SDLC (Claude, Gemini, DeepSeek), Figma, Jupyter Notebook

Domain: Financial data platforms (Bloomberg, Morningstar Direct, Salesforce); stakeholder communication, public speaking, team leadership
